Jaslyn Kaye Torres

Marikina, Philippines jaslynkayetorres@gmail.com 09915972561 github.com/justlanee

SUMMARY

Motivated Computer Engineering student with a strong foundation in hardware design, embedded systems, and digital circuit simulation, combined with practical office administration and data management experience. Eager to learn, adapt, and apply emerging engineering concepts and programming skills to solve complex technical challenges in embedded systems, hardware development, or IT infrastructure.

EXPERIENCE

Office Staff | .. | September 2026 - Present

- Manage and maintain large volumes of operational and numerical data using Microsoft Excel, ensuring high accuracy and quick retrieval.
- Perform fast, accurate typing and format documents for reports, official correspondence, and administrative records.
- Streamline spreadsheet workflows using Excel formulas and data verification techniques to reduce manual entry errors.

PROJECT

Smartphone-Controlled Arduino Remote Control Car

- Designed and built a wireless remote-controlled vehicle powered by an Arduino microcontroller and Bluetooth/Wi-Fi module.
- Developed an embedded program to interpret signals received from a mobile phone application and translate them into motor driver outputs.

Power Supply

- Designed, simulated, and built a regulated AC-to-DC power supply delivering stable voltage for lab electronics testing.
- Selected transformers, implemented diode bridge rectification, capacitive filtering, and linear voltage regulation.

ElectroEdge Application

- Developed "ElectroEdge," a structured study application tailored specifically for Computer Engineering majors.
- Implemented automated score monitoring features to track student performance and progress over time.
- Integrated deep learning metrics to analyze study patterns and guide users effectively through their review and exam preparation journey.

EDUCATION

Bachelor of Science in Computer Engineering | ICCT Colleges

Cainta, Rizal | 2027

Science, Technology, Engineering, and Mathematics | Pamantasan ng Lungsod ng Marikina

Marikina City | 2023

SKILLS

Programming: C, C++, Python, Java

Microcontrollers: ESP32, Arduino

Circuit & PCB Design: Circuit Simulation, Schematic Diagram, PCB Layout
